

Ideal Gas Law Practice Worksheet

Solve the following problems using the ideal gas law:

- 1) How many moles of gas does it take to occupy 120.0 liters at a pressure of 2.3 atmospheres and a temperature of 340 K?
- 2) If I have a 50.0 liter container that holds 45 moles of gas at a temperature of 200.0^o C, what is the pressure inside the container?
- 3) It is not safe to put aerosol canisters in a campfire, because the pressure inside the canisters gets very high and they can explode. If I have a 1.0 liter canister that holds 2.0 moles of gas, and the campfire temperature is 1400^o C, what is the pressure inside the canister?
- 4) How many moles of gas are in a 30.0 liter scuba canister if the temperature of the canister is 300.0 K and the pressure is 200.0 atmospheres?
- 5) I have a balloon that can hold 100.0 liters of air. If I blow up this balloon with 3.0 moles of oxygen gas at a pressure of 1.0 atmosphere, what is the temperature of the balloon?
